

If you are not accessing **eMETAR** with your cell phone then you are missing out on some of the most innovative new technology to come along in the aviation community in quite some time. Just set your minimums and **eMETAR**'s intelligent weather polling process will automatically notify you when you are "cleared-to-fly".

WHY WAIT AROUND FOR THE WEATHER TO CLEAR?

Use the Internet service on your cell phone and go to: www.emetar.com

myMETARs

Quickly display current decoded METARs from your list of favorite airports.

myTAFs

Quickly display current TAFs from your list of favorite airports.

myConditions

Enables you to modify your weather minimums and activates polling service for your account. This instructs the **eMETAR** service to start checking the weather until the conditions at the airport you specified are met. Once the conditions are **at or above** those minimums, you will be sent a text message via the address you specified in the "Deliver To" field.

Get METAR

Get the current METAR from ANY reporting airport around the world.

Get TAF

Get the current TAF at the specified airport. Remember, not all airports have TAF information.

Lookup

Find an airport anywhere in the world and get its current METAR or TAF.

Test System

Checks to see if **eMETAR** is functioning correctly by sending a test message to the address you specified in the [Deliver To] field via the web site.

Login / Logout

Login and Logout of the system. You must be logged in order to use some of the features available through your cell phone. The simple login process requires the password you created via the web site.

Get METAR

The current METAR or TAF from ANY airport!

Set Conditions

Start/edit the weather polling process directly from your phone!

Sample Message

You'll receive a message like this when you are **cleared-to-fly!**

Lookup

Don't know the code? Quickly find ANY airport in the world!
